¹⁾ Capillary tube length 1.5 m.

²⁾ The rated capacity is based on: Evaporating temperature $t^e = +4.4$ °C for range N, condensing temperature $t^c = +38$ °C, refrigerant temperature ahead of valve $t^l = +37$ °C, and opening superheat OS = 4 K.

³⁾ For R407C plants, please select valves from the dedicated R407C program

⁴⁾ TUAE with orifice no. 9 cannot be used for Biflow operation
